

Alumni Reviews

Rohan Shedbalkar (MBA-IT 2007-2009)

Associate Operations Manager @ Cognizant Technology Solutions.

Role: Project Lead (Unix Infrastructure Management)

I have a lot of amazing memories of my years at IndSearch. The MBA at IndSearch had a unique combination of business specific courses along with a deep dive into technical subjects which has given me a true edge in terms of career options in the IT industry.

The atmosphere between the students and professors is truly collaborative which enhances the learning experience. The learning approach adopted and the numerous presentation that we made during our course prepared me well for my professional career.

I would highly recommend the MBA course at IndSearch which will enhance your experience and abilities in turn preparing you for a successful career in the industry.

Govind Patil – MBA (Marketing) 2007-2009

Manager Marketing at Suhail Bahwan Group in Oman

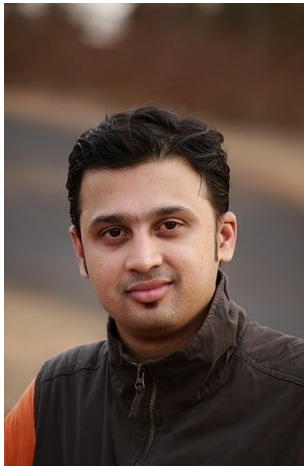

I have been working in the field of Marketing since I graduated from IndSearch Business School from year 2007. At the time I was hired, the companies were mostly looking for graduates who have real practical knowledge with marketing skills. The education from IndSearch did help me in getting lots of opportunities to work on numerous projects with reputed brands during my 2 years course.

Besides education, the extracurricular activities conducted at college, helped me in having perfect balance between personal and professional life. All credit goes to the wonderful faculty of IndSearch Business School!!!!

Anirudha Limaye – MCM (2006-2008)

Assistant Vice President @ Barclays Technology Centre

IndSearch is the place where education is not a business and the students are served with the perfect diet which is sufficient for them to be healthy - wealthy and make a bright future ahead.

Talent is nurtured by the Great Professors, who had devoted their lives to academics and now in a Self-actualization mode to help young talent. IndSearch made me more disciplined and helped me to grow not only professionally but holistically as a good human being.

IndSearch has state of the art campus through which we not only get facilitated with a course but get accustomed to mingling with the broadest spectrum of people.

Ritika Patwardhan – BMS (2016-2019)

Currently pursuing a 2 year diploma in Interior Design and planning to establish my own design studio.

I am an ex student of IndSearch, the first batch of BMS (2016-19). This college has an extremely diverse span of topics covered in the field of management, both theoretical and practical. I now realize that the curriculum is so well planned out that once you graduate you feel self sufficient in the field of management. I could also call IndSearch BMS the start-up kit to become an entrepreneur. Along with academics, there is a whole lot of co curriculars and extra curriculars which are extremely important in today's world, all opportunities served on a platter. All we have to do is grab them and

make the best out of it, for which we get professional and personal guidance. The institute has a perfect blend of what it takes to create a professional yet soothing working environment which makes the academic experience so efficient !

Yashraj Bhalerao

Client Associate at Never Grow Up

The three years I spent at INDSEARCH went by super fast because I enjoyed every minute I was there. What made my experience exemplary was the fact that I actually enjoyed learning about the key aspects of Management because the lecturers made them interesting for me.

The professional support I received from the management also helped me excel at the summer internships I undertook. At IndSearch it's not just about the curriculum you learn, but also industry insights that

you gain!

Atharva Bhat

Worked as Data Analyst and Executive CRM at KSH Logistics Pvt Ltd & KSH Distriparks Pvt Ltd and will be pursuing an MSc in Management Engineering starting September 2020 from the university 'Politecnico Di Milano'.

I was a student of the first batch of the BMS program. This course is specially designed to broaden ones managerial horizons which have proven to be extremely helpful and necessarily for me in the corporate world. The theory taught was supported by practical knowledge through various industrial visits and co-curricular activities. We had a very approachable and professional faculty to guide us throughout the program. Extra-curricular activities were also given equal importance which made the tenure at Indsearch extremely enjoyable. I could land

myself in a good firm as a fresher during the course and this was possible only due to the immense support extended to me by my faculty. I resigned recently as a Data Analyst and Executive CRM from the firm KSH Logistics Pvt Ltd & KSH Distriparks Pvt Ltd and will be pursuing an MSc in Management Engineering starting September 2020 from the reputed foreign university 'Politecnico Di Milano'.

Kedar Kurlekar

Sr. Service Manager, ATOS Global IT Solutions & Services

My association with INDSEARCH has been a wonderful experience. INDSEARCH has several strengths and one such strength is the faculty who provide immense guidance and support to the students. The course plan is industry centric and helps students to cope with practical work immediately. Great infrastructure (especially Bio Diversity Campus), a library with a wide array of books and wonderful staff members to guide, I'm grateful to have experienced one of the best MMS programs. I will highly recommend INDSEARCH who is looking out for Part Time Management Education at Pune.

Manisha Date

Independent Consultant, Life Skills and Lifelong Learning

I started working on my PhD in December 2005 and submitted my thesis in December 2009. It was a memorable journey. IndSearch is a great place to do your PhD. My guide, Dr. Ashok Joshi, was very encouraging and supportive throughout the PhD process. Discussions with him at different stages of research were very useful.

While doing my PhD, I attended various workshops at IndSearch, including one on Research Methodology. I got an opportunity to write a research paper with other faculty members. I could also interact with other students at IndSearch. All this helped build my research skills and keep updated about the latest trends in the field.

IndSearch is a very friendly place. The faculty members here were very supportive. They were always available for a brainstorm or quick reviews. The library was well stocked and the librarian was very helpful. The non-teaching staff was very friendly too. The overall atmosphere at IndSearch is very professional and homely at the same time. If you are thinking about PhD, I would highly recommend IndSearch to you.
